WORK EXPERIENCE

DevOps and SecOps Head

DigiBoxx Technologies and Digital India Private Limited

01/2024 - Present

Mumbai

Achievements/Tasks

- ▣ Raising support calls with vendors with post mortem analysis for server problems
- ▣ Implemented and configured S3 opensource alternative tools like Minio and ceph
- ▣ Django CICD pipeline implementation
- ▣ Worked on Docker swarm implementation in Three tier environment
- ▣ Opensource Docker registry Harbor with Docker scanning Trivy implementation
- ▣ CICD pipelines with SonarQube integration
- ▣ DR implementation with Terraform
- ▣ **Technologies used** : Aws ,Minio,VMware,Proxmox,Docker,Kubernetes,AngularJs ,Jenkins

Contact : Asikul - 9614450281

DevOps Lead

Lybl Healthcare India Pvt LTD

11/2022 - 11/2023

Noida

Achievements/Tasks

- ▣ Architect /Design and implement the next generation continuous delivery platform
- ▣ Create more stable operating environments by continuously improving the infrastructure to be easily deployable and scalable. Maintain advanced knowledge of agile methodology, development processes, and programming languages
- ▣ Designed and deployed containerized applications using AWS ECS clusters, improving scalability and resource utilization.
- ▣ Proactively seek opportunities to implement improvements in the development process and deployment pipeline. Drive and champion Continuous Delivery and automation wherever feasible
- ▣ Understand where automation can be applied to various aspects of the development process and lead projects to implement these solutions to gain organizational savings
- ▣ Created Kubernetes deployment, statefulsets, Network policy etc.
- ▣ Created non-production application on EKS Fargate for cost optimisation
- ▣ Created metrics and monitoring reports using Prometheus and Grafana dashboards.
- ▣ Facilitate distributed system reliability and scalability – and serve as a change agent for - DevOps
- ▣ **Technologies used** : Aws ,Java,React,Docker,EKS,S3,Jenkins

WORK EXPERIENCE

Solution architect

Engro Technologies PVT LTD

12/2021 - 06/2022

Achievements/Tasks

- ▣ Analyzing, executing, and streamlining DevOps practices
- ▣ Contribution to network design, database installation, design, scaling, fault tolerance, and recovery
- ▣ Strategies Automation toolkits include Consul, Packer, Terraform, Chef, CloudInit, Launch Configs, and Auto-Scaling Groups
- ▣ Responsible for ensuring configuration of monitoring for all implemented systems, creating dashboards and alerts, identifying and resolving system issues
- ▣ **Technologies used** : VMware Tanzu , Kompose , Ocelot api gateway ,AWS, ECS GitLabPipelines

Hyderabad

Lead Architect AWS and Devops

Neuralmetrics Pvt LTD

08/2021 - 11/2021

Achievements/Tasks

- ▣ Oversee operation of the production environment including monitoring and troubleshooting, review and scheduling of planned changes, and managing escalations
- ▣ Co-ordination with Product Managers/Owners, Development teams, and other Operations teams to schedule and support software releases
- ▣ Co-ordination with Customer Support, Operations, and Customers to resolve issues
- ▣ Establish and improve processes and practices to ensure timely delivery and high-quality work
- ▣ Facilitate or attend internal and external technical overviews and determine technical feasibility
- ▣ Review solution architectures to ensure they meet functional, performance, and operational requirements
- ▣ **Technologies used** : AWS, Burp Suite

Chennai

Tech Lead

Adcuratio Media India Pvt Ltd

12/2020 - 06/2021

Achievements/Tasks

- ▣ Installed and configured Jenkins for automating the build & deployments via CI/CD pipelines, built Docker images for containerized deployments and orchestrating with Docker Swarm. □
- ▣ Creation CI/CD pipelines using AWS Code Commit, Code Build & Code Deploy.
- ▣ Implemented and maintained Elastic search, Log stash for centrally collecting the logs to monitor the application & infrastructure metrics and creating dashboard/reports with Kibana for analytics.
- ▣ Use agile methodology throughout the project. Involved in weekly and daily bases release management.
- ▣ Migrated the application deployments on Kubernetes for classic orchestration and management securing with k8s secret manager and internal Docker repositories.
- ▣ Implemented process for release management, automated code deployment, configuration management and monitoring.
- ▣ Working closely with Internal/External Stakeholders, Development Architects/Managers & developers, across locations, to ensure timely delivery
- ▣ **Technologies used** : AWS, ECS GitLabPipelines, Nginx ingress , EKS

Bengaluru

WORK EXPERIENCE

DevOps Lead

Goomo Holdings PVT LTD

09/2018 - 09/2020

Achievements/Tasks

- Creating ,managing and architecting the Cloud DevOps activities in Aws, Azure,Rackspace and DigitalOcean.
- Involved in Architecting and Migration Some Applications from DCOS Mesos to Kubernetes.
- Created Local server Docker containers using Kubernetes that supports DEV, TEST, and UAT environments. Containerized all the Ticketing related applications - SpringBoot Java and Node.Js applications using Docker.
- Managed Ansible Playbooks with Ansible modules , implemented CD automation using Ansible, managing existing servers and automation of build/configuration of new servers.
- Setup a VPC environment & designed an effective backup strategy depending upon client requirements . Supported AWS Cloud environment with 200+ AWS instances and configured Elastic IP & Elastic Storage and experience working on implemented security groups and Network ACLs.
- Designed the project workflows/pipelines using Jenkins as CI tool and wrote Python Scripts and BASH Script to automate the build process.
- Created load balancers (ELB) and used Route53 with failover and latency options for high availability and fault tolerance.
- Created a Python Script to stop all the instances with a specific tag in AWS Instance using Lambda functions and made it into Cloud Watch Scheduler to schedule it every night.
- Used Nagios log server for network device log collection, network device log visualization, Nagios Network analyzer for net flow collection and analysis of IP transactions.
- Technologies used** : Aws, Azure, DCOS, Docker, Kubernetes , Kong api gateway ,Bash script ,Python

Bengaluru

IT Server Administrator

Travel Centric Technology(Hotelhub)

05/2015 - 12/2017

Achievements/Tasks

- Window server management and Managing Active Directory Services,DHCP, DNS ,GP Objects
- Vmware Server management by using Vcenter , Veeam backup and etc.
- Implemented new open source tools like OS ticketing tool (helpdesk ticket), Ocs Inventory & GLPI (Systems inventory) and Esxigraf (Monitoring of Esxi server)
- Technologies used** : VMware, Servers, KVM, Jenkins, Linux And Windows

Bengaluru

System administrator

Logix Microsystems PVT LTD(Izmocars)

02/2011 - 05/2015

Achievements/Tasks

- Troubleshooting of all OS / Hardware problems and Also Attending calls (from employees in USA) and solving their issues through LogMein or Team Viewer
- Window Administration & UNIX/Linux Administration Monitoring system logs and root's email for important messages such as errors or hardware failure errors
- Implemented and managed Content based web filtering for employees (Squid) and Inhouse mail server(Icewarp Email Server)
- Technologies used** : VMware , Linux ,Bash script

Bengaluru

SKILLS

ECS

Haproxy

Docker

DCOS Mesos

Kubernetes

Terraform

Kong API Gateway

AWS Route 53

SKILLS

IAM		EKS	
EFS		ELB	
S3		VPC	
RDS		Nagios	
Graylog			

EDUCATION

BCA

Mangalore Institute Of Management & Engineering

PUC

Jnanodaya Pre-University College, chamarajpet, Bangalore

PROJECTS

Lifafa Giftcards setup and management(www.lifafa.com) (02/2018 - 08/2020)

- ▣ Involved in initial setup and containerization of Lifafa website (PHP Laravel)
- ▣ Migrated the local server applications to AWS cloud and then containerised it.
- ▣ Implementation of CICD through Jenkins and github.
- ▣ Implementation of monitoring tool (nagios) with docker monitoring and alerts.

Toyota TSAM (South Africa) (02/2022 - 2023)

- ▣ Configured VMware Tanzu on the Vsphere server
- ▣ Deploying the api and backend services to VMware tanzu

CERTIFICATES

VMware Certified Associate - Data Center Virtualization (VCA-DCV)

Microsoft Certified Solutions Associate (MCSA)

AWS Certified Solutions Architect - Professional

AWS Certified Security - Specialty (SCS)
